Art Unit: 2652

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10, drawn to a slider suspension, classified in class 360, subclass 244.8.
- II. Claims 11-17, drawn to a method of moving a slider, classified in class 360, subclass 77.02.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the method of group II can be practiced with another materially different apparatus. Note that the method claims do not recite or require the presence of the specific suspension features recited in the apparatus claims.

Art Unit: 2652

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. During a telephone conversation with Mr. G. Smith on 1/5/05 a provisional election was made without traverse to prosecute the invention of Group I, claims 1-10. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

The application has been amended as follows:

6. This application is in condition for allowance except for the presence of claims 11-17 to an invention non-elected without traverse. Accordingly, claims 11-17 have been cancelled.

7. In claim 1, on line 4, "said actuator arm" has been changed to "the actuator arm". This corrects an obvious error.

8. The following is an examiner's statement of reasons for allowance:

Art Unit: 2652

The prior art does not teach or suggest a slider suspension with means for moving the slider parallel to the rotating disk surface by moving the actuator arm by a lever action through a principal axis with the slider parallel to the disk surface and flexibly mounted by a flexure at a second bias angle to the actuator arm, and means for radially moving the slider toward the track when the rotating disk surface is bent through the second bias angle where the means are read in light of the structures disclosed and shown in figures 4A-6B and 7A-8D.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert S Tupper whose telephone number is 703-308-1601. The examiner can normally be reached on Mon - Fri, 6:00 AM - 3:30 PM (first Fri off).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hoa Nguyen can be reached on 703-305-9687. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
